

## Primavera P6 Application Administration 15

**Duration:** 2 Days

### What you will learn

This Primavera P6 Application Administration 15 training teaches you how to build enterprise data structures and configure settings to support an enterprise implementation or Cloud deployment. Expert Oracle University instructors will teach you how to use Primavera Gateway to configure integrations between P6 and other applications.

Learn To:

Manage EPS and OBS.

Create resources and roles.

Add users and configure security.

Manage users on-premises.

Manage enterprise settings.

Support project management processes.

### Benefits to You

By taking this course, you'll develop a deeper understanding of how to use Primavera P6 to benefit your business. Through in-person or online training, application administrators, program offices or core teams can learn how to more efficiently execute an enterprise implementation.

### Audience

Administrator

Functional Implementer

Project Manager

### Course Objectives

Add resources
